Appendix 1 — Affiliate Commission Models

The Company offers four remuneration models in the Affiliate Program:

- **Revenue Share**
- **Turnover Share**
- **CPA (Cost Per Action)**

• Sub-Affiliate

The availability of commission models in certain countries is the Company's decision and is not subject to dispute.

The Revenue Share and Turnover Share have a multi-level commission system. The payout level is set according to the Partner's level for each trader individually at the time of their registration via a referral link. The level is fixed for each trader permanently and can't be increased or decreased, regardless of changes in the Partner's level.

The Partner's level is updated every hour and depends on the number of deposits made by customers. A certain number of deposits lead to a certain level to be assigned (Spreadsheet 1). Determination of the Affiliate's level is made automatically on an hourly basis. Statistics are also refreshed every hour.

The Partner has the right to choose the remuneration models available to him in accordance with the terms of this Agreement. By sharing a referral link of a specific commission model, the Partner automatically agrees with this commission model calculation terms.
